

Using Windows Vista:

Our sincere apologies to you as we no longer support our game with Vista. We do provide a patch for the dance pad on Vista. This patch has worked for our customers. Click to download. [↓](#)

To apply the patch:

- 1 - A zipped formatted file will be sent to you. Unzip the file and take notice of where the file is saved.
- 2 - Copy this unzipped VTDDD.exe file
- 3 - Open c:\Program Files\Big Idea\VeggieTales\VeggieTales Dance Dance Dance\Win32
- 4 - Paste the VTDDD.exe file patch into the game folder. This will **replace** the existing VTDDD.exe file.
- 5 - Always remember to plug your dance pads in before inserting the disc to start the game.
- 6 - Start the game from the pop up window. If the dance pad comes unplugged during play you will need to exit the game, plug it back in, and restart the game.
